Education

SIES Graduate School of Technology

Bachelor of Engineering in Artificial Intelligence and Data Science - 8.51/10

Dec. 2021 – May 2025

Nerul, Navi Mumbai

Shri T.P Bhatia College of Science

Higher Secondary Education - 91.16%

July 2019 – April 2021

Mumbai, Maharashtra

Experience

The Good Bug

AI Engineer

February 2026 – May 2026

Prabhadevi, Mumbai

- Architecting and leading deployment of **production-grade LangGraph multi-agent systems** powering customer support (**Goodsy**), health coaching (**Bugzy**), growth, and internal operations.
- Owning **end-to-end system design**, including Meta WhatsApp, LiveKit voice infrastructure, LLM orchestration, and backend integrations.
- Establishing evaluation pipelines, monitoring, and performance optimization while driving experimentation and product iteration to ensure **scalable, reliable AI systems with measurable business impact**.

The Good Bug

Product Intern (AI)

August 2025 – January 2026

Prabhadevi, Mumbai

- Built and deployed initial **LangGraph agent workflows** to automate customer interactions.
- Integrated **Meta WhatsApp APIs** to enable AI-driven messaging capabilities.
- Developed a prototype **voice AI agent** using LiveKit and open-source components.

Ergode

AI Intern

June 2025 – July 2025

Andheri, Mumbai

- Orchestrated AI agents using **n8n** to automate complex business workflows, reducing operational overhead.
- Developed **LLM-powered automation pipelines** that integrated with enterprise systems.
- Built **end-to-end AI solutions** from prototyping to deployment.

Projects

Bugzy – AI Health & Wellness Chatbot | *LangGraph, AWS Bedrock, RAG, FastAPI, MongoDB*

- Designed a **multi-agent orchestration system** with dynamic routing across **3 specialized agents** powered by complex per-agent LangGraph state machines.
- Built a **health knowledge retrieval pipeline** (Pinecone + all-MiniLM-L6-v2) with **CTAS-based emergency detection**, 5-layer medical guardrails, and contraindication checking across 30+ products.

Goodsy – AI Customer Service Agent | *LangGraph, AWS Bedrock, Pinecone, FastAPI, Docker*

- Automated** the majority of customer service interactions via a multi-node LangGraph state machine handling order tracking, returns, exchanges, and escalation across WhatsApp and Freshchat.
- Built an **LLM-powered order agent** (AWS Bedrock) with priority-based intent detection and a **semantic search microservice** for accurate product FAQ responses.

Achievements/Extra Curricular

Level SuperMind Hackathon 2025 | *National Finalist* 🏆

- Finalist** in the Level Supermind Hackathon 2025, a national level competition in collaboration with **BeerBiceps, Hitesh Choudhary, AWS, LangFlow, and DataStax**. Invited to the **Level** office in Mumbai for a **24-hour overnight hackathon**.

Google GenAI Exchange Hackathon 2024 | *Top 5 across INDIA* 🏆

- Finalist** among the top 5 teams in the Glance Problem Track, out of over **38,000** registrations and 3,300 teams formed. Invited to **Google's Gurgaon office** for a special Demo Day.

Smart India Hackathon 2023 | *All-India Rank 7*

- Ranked **7th all-India** and waitlisted for a computer vision problem statement in SIH 2023. Cleared the internal hackathon and was the only team from the college to reach the official first round of SIH 2023.

Technical Skills

Languages: Python, SQL, C++

Tools/Frameworks: TensorFlow, PyTorch, Keras, Scikit-learn, LangFlow, n8n, LangChain, HuggingFace, LangGraph, LiveKit, PipeCat, Pinecone, Sentence-Transformers
